About Us

Joanne & Glenn Stursa have over 30 years experience in construction, mining, equipment repair and operation. Recognizing the lack of water truck availability at project sites they decided to start Great Basin Water Supply in 2016 as a woman owned DBE providing water truck services for dust control. The company has grown from one single water truck to seven.

Our water trucks are fully equipped with 6 spray heads, 50 ft fire hose, 8 foot dump bars, remote operated cannon and 4000 or 5000 gallon tanks.

We have two tractor trucks a flatbed trailer and a lowboy available for material or heavy equipment moves on site or from one site to another.

Just added to our fleet January 2025 is a 21' Super Ten Dump Truck with one more on the way.
